## **1. Background:**

Land-use planning can be applied at three broad levels: national, district and local. Local level planning is about getting things done on particular areas of land what shall be done, where and when, and who will be responsible. It requires detail basic information about the land, the people and services at local level. However, Nepal has only regional level data base on land use, land system and land capability which were produced by Land Resource Mapping Project (LRMP, 1983/84). Realizing this fact, the Ministry of Land Reform and Management of Government of Nepal established the National Land Use Project (TSLUMD) in Fiscal Year 2057/058 to generate the necessary data bases on the land resources of the country.

In the first phase, the National Land Use Project of Nepal had initiated several projects at district level and prepared Land Resource Maps and Database at 1: 50,000 scale for the whole Nepal. It had also prepared same kinds of maps and database for Kirtipur, Lekhnath, Madhyapur Thimi and Bhaktapur municipalities at larger scales. Finally, former NLUP was mandated to prepare land resource maps of Village Development Committees (VDCs) of Nepal for local level planning through outsourcing modality. Up to fiscal year 2073/74, former NLUP had completed preparation of land resource maps and database for 1404 VDC/Municipalities of terai region of Nepal. This digital database includes VDC level present land use, soil, land capability, land use zoning, cadastral layers and VDC profile with bio-physical and socio-economic information. It is well known that the Government of Nepal has approved the National Land Use Policy, 2069 on the 4<sup>th</sup> Baishakh of 2069. It has intended to manage land use according to land use policy of the government of Nepal and had outlined six zones such as Agricultural area, Residential area, Commercial area, Industrial area, Forest area and Public use area. The policy has defined the respective zones as per the land characteristics, capability and requirement of the lands. Further, for the effective implementation of land use zones in the country, the National Land Use Policy, 2069 had clearly directed for an institutional set up of Land Use Council at the top to the District level and Municipality / VDC level at the bottom. It has added further importance to the former NLUP projects on preparation of VDC level maps and database. However, based on the scenario developed after the major earthquake of 12<sup>th</sup> of Baishakh 2072, Government of Nepal has re-directed for possible amendment on the existing Land Use Policy, 2069 which possibly may also emphasize the safe and secure settlement along with the environmental protection and ensuring food security. Moreover, the Land Act 2021 (Sixth amendment) have mandated for designation of eleven land use classes, some of which obviously differs from what exist in the National land use policy, 2069. TSLUMD at present endeavors on the same to maintain the essence of the proposed amendment on the National Land Use Policy and as mandated by the Land act 2021 (Sixth Amendment) at the same time with the strategy of completion of land use mapping within 5 years to come as directed by the parliamentary committee in 2071. Land Use classification should be carried on the basis of Land Use policy 2072.

Now, Jhimruk Rural Municipality has intended to create a local level database being based on the available database. The main purpose of this work is to initiate the formation of local level database and use the available database.

## **2. Introduction to Study Area:**

Jhimruk Rural Municipality is located in Pyuthan District under Lumbini Province of Nepal. The Rural Municipality was established in accordance with Article 295, Clause (3) of the Constitution of Nepal. The total area of the municipality is approximately 106.93 square kilometers. The maximum temperature recorded in Jhimruk Rural Municipality is around  $46^{\circ}\text{C}$ , while the minimum temperature drops to approximately  $0^{\circ}\text{C}$ .

## PART II

### Section 8. Conditions of Contract and Contract Forms

#### Foreword

1. Part II includes standard Contract forms for Consulting Services (a Lump-Sum Contract).
2. **Lump-Sum Contract:** This type of contract is used mainly for assignments in which the scope and the duration of the Services and the required output of the Consultant are clearly defined. Payments are linked to outputs (deliverables) such as reports, drawings, bill of quantities, bidding documents, or software programs. Lump-sum contracts are easier to administer because they operate on the principle of a fixed price for a fixed scope, and payments are due on clearly specified outputs and milestones. Nevertheless, quality control of the Consultant's outputs by the Client is paramount.
